@chasekasperowski#253 1 day ago

Just installed one. I've been building vescs for almost 2 years now. This kit was amazing. It is truly plug and play and I believe that almost anyone can do it. The he board rides so much better and safer, and this controller has a lot of room to upgrade parts down the road. Headlights are great, and the pre loaded software is amazing. I didn't even open the vesc app before riding. I just installed the kit and turned it on. I'm very satisfied quality of the kit as well.

I sold my GT once I heard the Xr kits were in. Excited to try it out!

1 Reply

@CayoticProphet 5 days ago

BRAVO TONY!!! This is amazing! I'll take 2 kits!

If you get bored now that there are drop in kits for everything, wireless remote start/anti theft key fobs should be next on your list. I had to uninstall mine since I lost the fob while doing yard work.

Well done Tony, doing incredible work!

2 Reply

@Allenvertex 5 days ago

can you make a video on how to do this: add 80ml of ATF fluid into your hub.

11 Reply

@nult 5 days ago

finally some way to fix them, the only reason i did not get me one is that you can't fix them, and futuremotion does everything to prevent it, its good to know the community and other corps do somethings about it

-  @kevinepperly3191 1 day ago  
Thanks for this video Tony. I am having an issue. My kit installs fine and powers on. However, when I get to the point where I plug in the charger to test if the board will charge before reassembly the light on the charger stays green. It turned red when all the FM hardware is installed. The charge plug is plugged into the new connector and the charge harness is plugged into the BMS. What could be wrong?

   Reply
-  @MrJoeefrombuffalo 5 days ago  
Definitely getting one to wake up my XR that's been gathering dust since I got the Adv pro. Hopefully this kit allows us to monitor charging rate with an ETA to full charge. On that note what apps connect to the kit? if we want to put our own tunes in can we?  
I prefer to upgrade my battery at the same time. Please post options bonus the advantages of each.

## PintV Power Kit installation

floatwheel  
6.91K subscribers

274

6.2K views 2 months ago

The most important piece of upgrade you should install on your pint x or pint, this will bump up your power to the GTV level if you have a Pint X, this will bump up your power to stock GT power if you are having a Pint. Check out all the benefits here at floatwheels.ru ...more

@Julian3vill 2 months ago (edited)

Some tips:

1. use thread locker especially for the big hub bolts. You'll probably get crunches if you don't!
2. For the controller & battery gaskets: you can clean them with soapy water (very ill soap) and recondition them with some vaseline. if you decide to cut them, probably super glue will work to glue the ends. Do it before applying Vaseline...

How bright are the replacement headlights and taillights? The original lights are super dim, are the new ones substantially brighter than those?
-  @chrisc790 2 months ago  
Tony, love you guys! Any eta on adv v2 electronics? Thank you
-  @brandonaskins7969 2 months ago  
It's the same for the Pint and Pint X is the same kit right?
-  @DannyVdesign 2 months ago  
"Configurable haptic buzz and pushback"  
Wow thats awesome! CPeeSC get wrecked.
-  @kody7041 2 months ago  
do we have to program the board at all for pushback or top speed or can you just install and go?
-  @SandovalRoldanR 2 months ago  
Se ve un poco difícil pero seguro lo haré 🙄
-  @ilfiliplop651 1 month ago  
What firmware is preinstalled?
-  @rotz357 2 months ago  
Can we find a way to watch all your old uploads that are gone. The video on setting up the floatwheel is important to alot of people
-  @float986 2 months ago  
What app (android) can i use for making config & profile changes?
-  @Dan-et1od 2 months ago  
@Tony any eta yet on GTS-V? Can't wait to try 113v vesc and slap a n52 655 on it.
-  @MrPharmer2012 1 month ago  
With stock pint battery how many miles can you get on this?
-  @jamesmartens160 1 month ago  
My kit arrived with no Rad plate 🙄 - now I cannot finish my upgrade, pretty sure this needs heat dissipation...
-  @wannabecryptoface2700 2 months ago  
ADV 2 ETA??
-  @raymondofong32 2 months ago  
Tony, 想用問多一次可否用微信支付給你們? 和寄到香港? 另外我沒有用過其他app 去設定pint, 這個是不是已經設定好? 自己也可以修改? 我要訂2套呀. 謝謝你.
-  @독모현 2 months ago  
Tony, I am Korean. Please understand that I am using Google Translator. I wonder if, except for the United States where there is a lawsuit, it is not possible to sell it as a general payment other than coins in other countries.
-  @marcosgonzalez84 2 months ago  
I need this kit for my Pint
-  @ihazhedont 2 months ago  
Small question: the part of the controller top plate that is being removed, isn't it a stiffener ?  
  
The footpad of the pint are plastic if I'm not mistaken, by removing the stiffener, no risk to simply break the lid ?
-  @p0rtugeek 2 months ago  
Kinda wishing I had not sold my Pint.
